

Cool-down #2

Gross motor movements:

- Cycling at 60% of MHR, 15 minutes.
- Swimming at 60% of MHR, 15 minutes.

Stretches:

- Ballistic stretches

- *Hamstrings.*
 - Swing leg backwards & forwards through full range of movement.

- Proprioceptive neuromuscular facilitation

- *Hamstrings.*
 - Person 'A' raises leg to maximum height. Person 'B' holds leg, resists pressure applied by person 'A'.
- *Quadriceps.*
 - Person 'A' lies prone on floor. Person 'B' straddles person 'A', facing towards the feet. Person 'A' bends nearest knee upwards, person 'B' pushes foot downwards, person 'A' resists.
- *Lats, deltoids, pecs.*
 - Person 'A' places arms back, behind shoulders. Person 'B' applies pressure, resisting person 'A'.

- Static stretching

- Tibialis anterior.
- Soleus.
- Gastrocnemius.
- Hamstrings.
- Quadriceps.
- Hip flexors.
- Abductors.
- Gluteus maximus.
- Lower back.
- Rectus abdominalis.
- Pecs.
- Lats.
- Deltoids.
- Biceps.
- Triceps.
- Trapezius.

All stretches should be held for 20 seconds & repeated twice. Bouncing should be avoided, as it can lead to injury. Stretches should not cause pain. Left & right sides should be stretched evenly.
